External use under NDA only

Integration of a real-time consumption monitoring solution, analysis of the site's energy performance and advice on the implementation of actions.

Equans solutions

Equans set up a **customized Energy Hypervision** : TGBT 1 & 2, Calories U1 & U2, General Water following a **Flash Audit at start-up**, which enabled performance actions to be identified and summarized in a comprehensive report. **Monthly monitoring and quarterly assessments** enable us to draw up a monthly **report** and select one action per quarter.

Customer benefits

Boiron now benefits from reliable, long-term energy monitoring, a precise energy and carbon progress plan, and support from energy experts.
