partners

Customer's challenges

- Responding to emergency calls, maintaining order and managing crises
- A decision-making and operations support tool
- Understand the operational context in real time, from several points of view, and coordinate the actions of agents
- Have a single, unified central solution where partner videos are pooled, regardless of the VMS used

Our solutions

- Allows video protection images from several partners to be distributed in real time to government departments
- A single video protection system (VMS), interconnected with partner VMSs, to view their video streams
- An offline mapping module to identify available flows
- A mobile mode for sharing video streams from the central system or smartphone with tablets and smartphones

Customer's benefits

- Extensive access to videos within their perimeter
- A wide range of law enforcement and security personnel able to view these videos
- Artificial intelligence to simplify automatic monitoring tasks and free up resources
- Un déploiement au niveau départemental, accessible au niveau régional, et à terme au niveau national

CSR commitment

- Compliance with health and safety policy
