Partnership	N/A
Start date	2021
Duration	5 years
Amount	> 1M €
Labels	N/A

Key figures

?

Number of employees mobilised

?

Number of equipment items maintained

Customer's challenges

- Participate in the waste recovery and conditioning programmes at CEA's Marcoule site
- Ensure the maintenance of the facilities used to support remediation and dismantling, as well as ad hoc facilities
- Ensure the operational readiness maintenance of high and low voltage equipment for these facilities
- Guarantee correct operation and monitoring of Safety Functions

Our solutions

- Specialised multidisciplinary team with 24/7 on-call service
- Reduce costs by prioritising preventive maintenance over corrective maintenance and minimising rejuvenation work
- Maintenance engineering expertise (digitisation of interventions and deployment of predictive systems)
- Maintenance of existing equipment: electrical distribution and lighting, inverters, chargers, batteries, etc.

Customer's benefits

- Draw on our multidisciplinary skills
- Guarantee project performance through our design/operations approach
- Adaptability and flexibility of resources
- Project coordination under control

CSR commitment

- Application of CEA's health and safety policy
