buildings to secure

1
hypervisor (OBS Manager) ensuring centralization of the security solution (access control, intrusion detection, intercom, etc.)

Customer's challenges

- To provide a centralized security solution through hypervision software
- To detect unauthorized individuals entering sites, to monitor multiple sites, and to control access
- To strengthen the protection of citizens, property, public buildings, road safety, and to assist individuals
- To maintain the security hypervisor, intrusion and assault prevention systems, access control systems, and intercom syst

Our solutions

- Partner since 2021, extension & modernization of security and Hypervision systems
- Centralized management of all business lines at the OBS Manager hypervisor level
- Recovery and integration of technical and fire alarm systems on the safety hypervisor
- Maintenance of devices in this field
- Implementation of a ticketing and network monitoring tool

Customer's benefits

- 24h/24 & 7j/7 security for municipal buildings / Enhanced security measures
- Real-time visualization of sensitive areas / performance & scalability of the security system - Network supervision
- Maintenance and servicing of security equipment (access control, intrusion detection, intercom systems) & Hypervision
- Guaranteed continuity of service across all facilities / Reduction in the number of interventions and MCO costs

CSR commitment

- Site waste management and monitoring
- Compliance with environmental regulations and Equans CSR policy
- Reducing the carbon footprint of travel
