Project management	DGAC - DTI
Operator	ADP
Start date	2023
Delivery date	2023
Amount	> 1M €

## Key figures

**6**

site weeks per radar

**10**

radars to deploy in France

**95**

Meters of height for the control tower

## Customer's challenges

- To work with a reliable and adaptable local partner who understands the end customer's environment
- Emphasizing the ability to respond to the demands of the airport environment, marked by constraints
- Reduce the impact on air traffic controllers and air traffic
- Ensure a high level of excellence in deployment on site of installations

## Our solutions

- Assistance with transporting and handling equipment after customs clearance
- Deployment in a new technical room: bay, control panel, console
- Connection and assistance with radar testing once the radar has been installed on top of the control tower (95m)
- Helicoptering the radar antenna to the top of the tower, in coordination with ADP / DGAC / BGTA / SSLIA

## Customer's benefits

- INEO as the unique contact for all sites
- Assistance in drafting the Air Safety Impact Assessment (ASIA)

## CSR commitment

- Compliance for the rules
- health and safety policy
